FEATURES AT A GLANCE

- **Pour-Over Operation** – NO Plumbing Required.
- **Powerful Heating Element Provides Quick Recovery for Faster Brewing.**
- **Large-Volume Water Tank for Greater Brewing Capacity.**
- **Space-Saving Design.**
- **Stainless Steel Construction with Black Vinyl Coating.**
- **Lighted Rocker-Switches Indicate System Functions.**
- **Standard 120VAC Operation.** (Export voltage available.)
- **Optional —**
 - Crystalline Glass Coffee Bowls.
 - ThermoPro Stainless Steel Airpots.
 - ThermoPro Stainless Steel Servers.

Cafe™ Pour-Over Systems...Exceptional Quality Coffee from a Convenient "Place Anywhere" System

These brewers bring exceptional convenience, value and coffee quality never before achieved by pour-over systems. The CAFE line features generous tank capacity, quick recovery heating elements and a large, wide-mouth inlet with an attached flip-open lid. These design elements together with a precisely engineered spray head and brew cone combination allow quick and thorough extraction of quality coffee flavor.

The CAFE Pour-Over models require no plumbing and plug into standard 120VAC wall receptacle. Simply place the CAFE model in the desired location, pour in water and connect power. It's ready to go. A brew-ready light tells you when water has reached proper brewing temperature.
